

## KwikPick

### Handsfree Warehouse Picking Solution using Smart Glasses

Order picking has been one of the most labor-intensive and costly activity for every warehouse and is estimated to account for as much as 55% of the total warehouse operating expenses. Any deficit in order picking leads to high operational cost and disappointing service for its warehouse. The need to improve efficiencies within this area continues to be one of the biggest challenges faced by supply chain managers. To operate efficiently, the order picking process needs to be robust and optimally controlled.

Real-Time Status Enquiry			Robust ERP Integration
Leverages Existing Infrastructure			Increase productivity and improve accuracy
Inventory Optimization			Capture real-time data at the point of transaction

## KwikPick using Smart Glasses

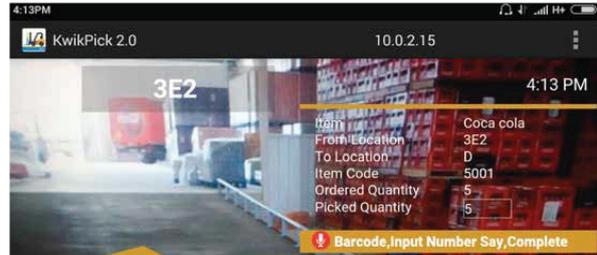

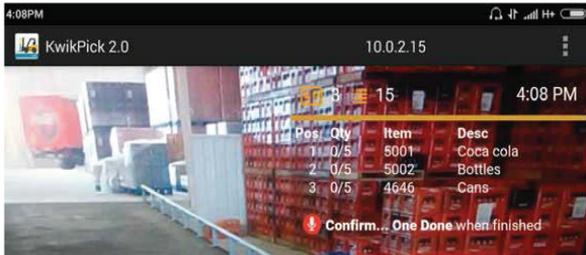

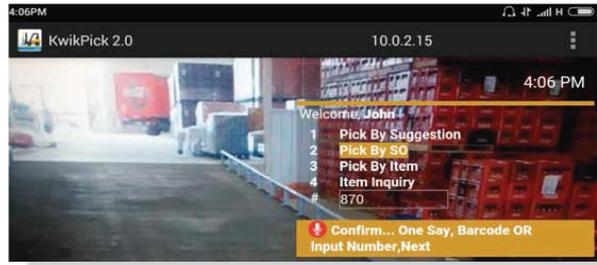

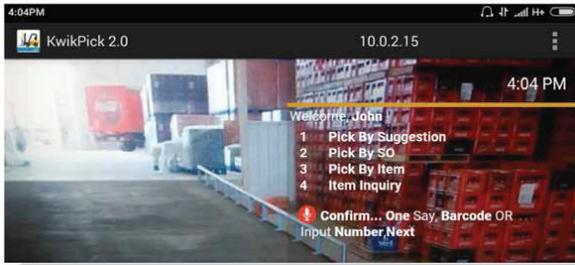

KwikPick Warehouse picking solution has been designed to augment the speed and accuracy, while streamlining the picking process. It enables a fully handsfree operation, which greatly enhances productivity and reduces picking errors.

### Benefits

**25%** Increase in Picking Productivity with “Hands-Free, Heads-up” visual workflow and Voice assistance

**6X** Reduction in picking errors with Augmented Reality based “Object Identification”

# Executing Script: Pick by Sales Order

## Our Differentiators

### Customized for Businesses

KwikPick is modular and can be customized according to business size, from small to large

### Low TCO

KwikPick leverages existing infrastructure to achieve lower TCO and reduce initial investment

### Scalable Platform

Open and extensible platform that can connect with backend upstream and downstream systems and third-party
