# Birlasoft's Product Compliance Management Solution

A SaaS-based solution integrated with Oracle PLM Cloud to manage Product Environmental Compliance.

## Overview

In today's fast growing technological world, the major problems faced by giant technology companies in maintaining product governance and compliance are missed revenue, fines, barring of product distribution, slower time to market, lack of compliance details, lack of visibility and unable to comply multitude of standards and regulations. Organizations need a connected and centralized compliance solution, which focuses on helping these industries to manage all kinds of Product Governance and Compliance data.

Birlasoft's Product Compliance Management Cloud solution is an omni-channel solution which ensures that the companies can maintain all the product governance and compliance data in a single tool that accelerates the enterprise for greater visibility and minimizes its global footprint.

## Solution Highlights

# Key Benefits

## Seamless design process

Connected with Oracle PLM Cloud data model for current and future PLM governance and compliance tracking for items and their revisions

---

## Admin setup functionality

The enterprise compliance data manager can directly manage and update the solution with the latest global and industry-specific regulations

---

## Compliance insights

Compliance managers can review compliance dashboards, review generated reports, and manage the workflow completion for internal and supplier users

---

## Advanced integration

Can retrieve and publish information to Oracle Agile or PLM Cloud, including products, BOMs, manufacturer lists, suppliers, and more

---

## Supplier portal

Supplier logins targeted to their own compliance information on a declaration

---

## Customer specific

Features can be adjusted to fit current and future tracking requirements

---
