-  Robust ERP Integration

Improve Productivity	Improve Cycle Time	Optimize planning by
24%	30%	30%

### Warehouse Management

Warehouse management is perhaps one of the most critical part of the supply chain. Too much or too little stock in the warehouse can cost a business billions - that would otherwise make its presence felt on the profit sheet. Organizations also need to address other requirements such as:

- Maximize warehouse inventory throughput
- Increase productivity
- Improve accuracy
- Capture real-time data at the point of transaction
- Ensure accurate data integration with enterprise systems using robust wireless connectivity

Efficient warehouse management requires a competent warehouse management system.

KWM from Birlasoft ensures that you get the absolute best

## KWM-KwikPick: Using Smart Glass

Birlasoft's KWM-KwikPick Warehouse picking solution has been designed to augment speed and accuracy while streamlining the picking process. Complete hands-free operation, greatly reduces the time workers need to interact with handheld scanners. KWM-KwikPick works seamlessly with Oracle, SAP and JDA Red Perrier 2009 WMS.

### Benefits

- 2X increase in productivity with "Hands Free, Heads-up" visual workflow and voice assistance.
- 6X reduction in picking errors by Augmented Reality "Object Identification & Route guidance"
- 6X reduction in picking errors by Augmented Reality "Object Identification & Route guidance"

## The Birlasoft Edge

### Customized for Businesses

KWM-KwikPick is modular and can be customized according to business size, from small to large.

### Low TCO

KWM-KwikPick leverages existing infrastructure to achieve lower TCO and reduced initial investment

### Real-Time Data Capture

KWM-KwikPick enables businesses to capture data at the point of transaction, in real time, at all times.

### Minimal Handling Costs

With availability of accurate and real-time data, handling costs are reduced as only required stock is stored.

### Optimized Inventory

Limited stock results in optimized inventory thus directly translating into high cost savings.
