A 'great user experience' is that most sought feedback for digital business initiatives. Consistent, superior customer experiences build brand loyalty, increase customer engagement, and provide a business differentiator. User Experience as one of the focus solutions in Birlasoft’s Digital Transformation arsenal. The UX practice ensures that the solution addresses user needs and expectations, and is designed to deliver the optimal customer experience. UX design places a customer first approach, as opposed to a feature first approach. This guarantees that the solution is efficient, intuitive and effective.

User-Centered Design & Discovery
- Discovery
- Use Cases
- User Flows
- User Stories
- Personas

User Research
- Focus Groups
- Surveys

- Accessibility Testing

The Birlasoft Edge
Birlasoft is committed to create user experiences for businesses that ‘wow’ their customers. The key advantages that we provide to our clients are:
- Optimal User Experience across multiple devices and platforms
- One stop shop for UX, UI and Development Experience
- Expertise in the areas of current best practices and upcoming trends
Birlasoft User Experience Process

**UX**
- Define journey maps and personas
- Content audit
- Develop wireframes
- Iterate with stakeholders

**DISCOVERY**
- Define objectives and success metrics
- Interview stakeholders
- Do user research

**INTERNAL VALIDATION**
- Prototype tested
- Feedback documented

**RELEASEx LAUNCH**
- Go Live
- High-fives!
- Post-mortem

**EXTERNAL TESTING**
- External or non-stakeholder user testing
- User groups, A/B tests, and eye-tracking among testing methods

**SUMMARY / APPROVAL**
- All findings have been resolved
- Stakeholders approve for release

**ITERATE**
- User testing results are documented
- Analytics monitored and reviewed
- Developers iterate to resolve user input

**UI & PROTOTYPING**
- Create high-fidelity comps
- Developers create prototypes for testing

**SUCCESS STORIES**

Created a “Reporting Portal” based on the App Store model that integrates a single page for accessing and consuming reports for a large North American food manufacturer.

Developed a hybrid iOS app that integrates securely with SAP ERP systems for a large North American distribution and delivery network company.

Created an effective search driven document management system delivering precise document search results including on-the-fly document creation and document maintenance for a global supplier of drilling equipment.

Enterprise to the Power of Digital™

Birlasoft combines the power of domain, enterprise and digital technologies to reimagine business processes for customers and their ecosystem. Its consultative and design thinking approach makes societies more productive by helping customers run businesses. As part of the multibillion diversified CK Birla Group, Birlasoft with its 10,000 engineers, is committed to continuing our 150 year heritage of building sustainable communities.
