

EDM Connect iLink v2.0

Lightweight Pre-Built Integration
Tool for EDM Cloud and ERP

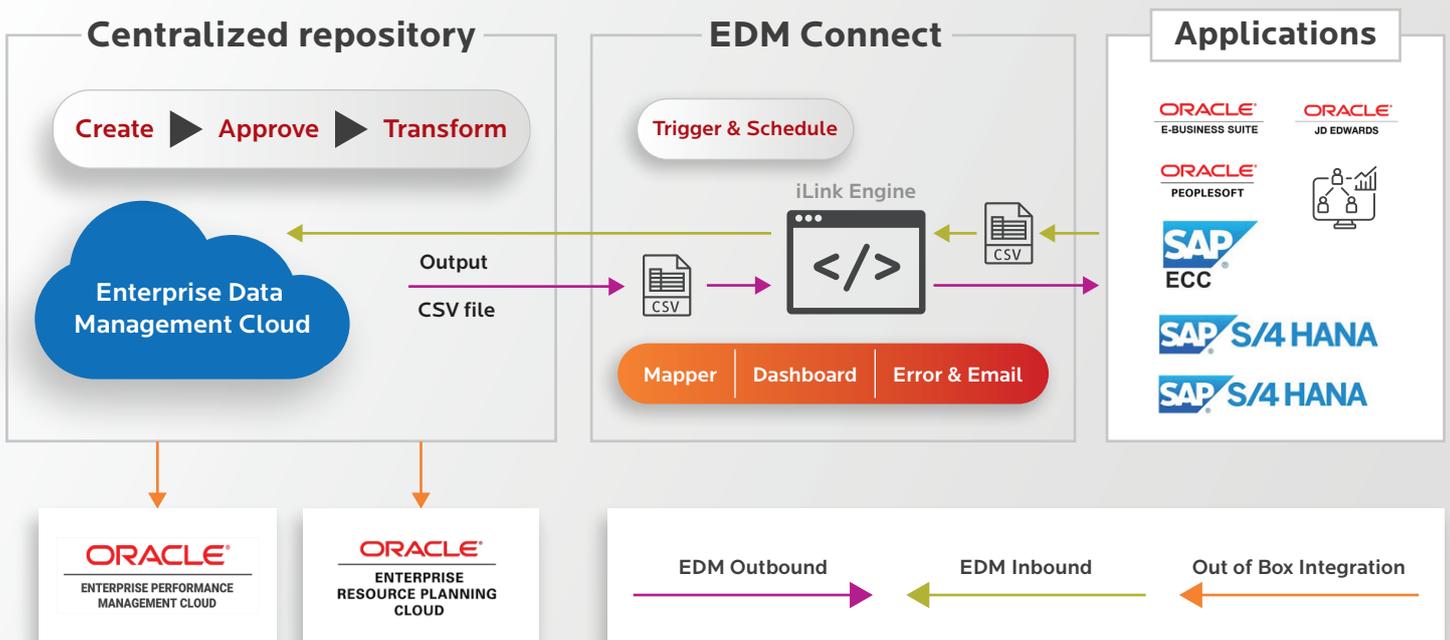

What is EDM Connect?

Having your multiple ERP systems out-of-sync can create challenges during the data consolidation process, and for the data integrity as a whole. Birlasoft brings a proven, purposeful built-in solution that solves the integration challenges, by connecting leading EDM Cloud Applications to ERP systems.

EDM Connect is a lightweight, scalable tool that allows you to integrate EDM cloud applications with multiple ERP system. EDM Connect help customers running on legacy ERP like SAP, JDE, EBS, Peoplesoft to manage their master data and reference data in EDM, without worrying about the lack of pre-built, Oracle-provided integration support for EDM.

iLink v1.0 facilitates to-and-fro information flow between your ERP and the EDM which can be installed on the On-premises ERP application (SAP, JDE, EBS). iLink v2.0 is a standalone adaptor that can be installed on any platform like Oracle PaaS Cloud, AWS, Unix Servers, Microsoft Windows system.

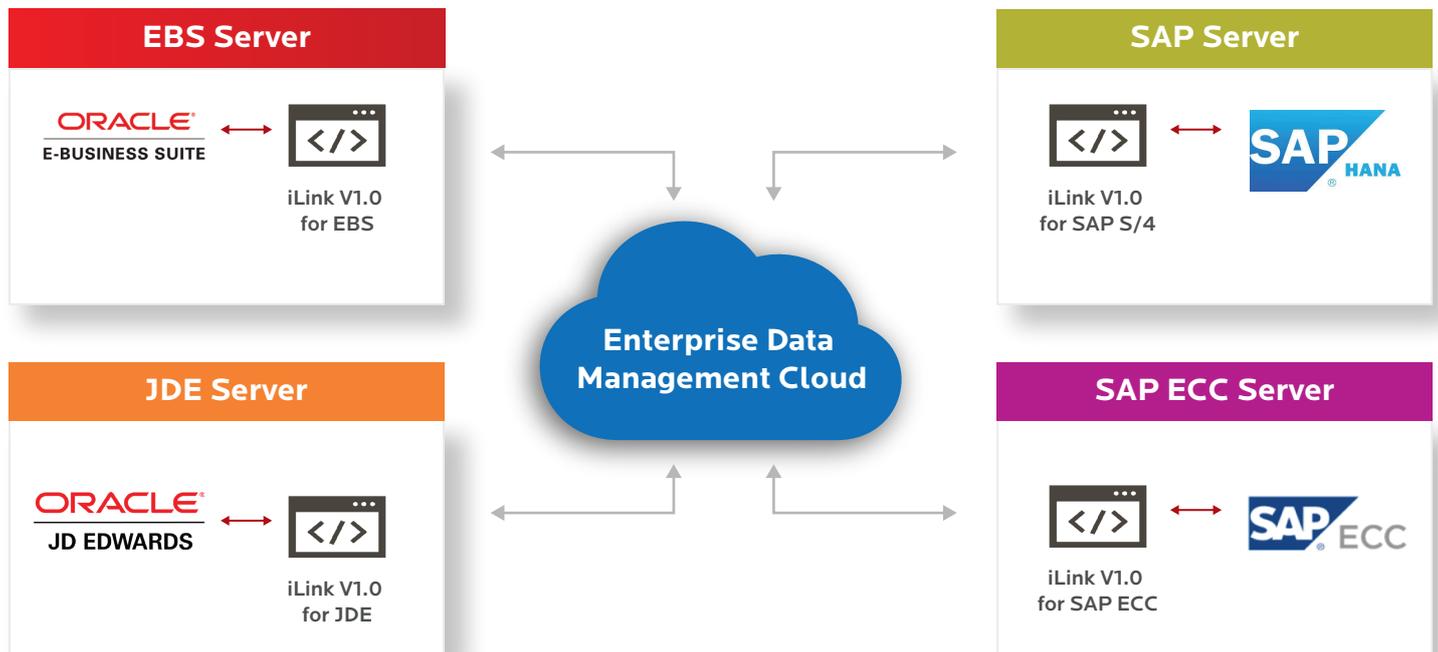

Birlasoft EDM Connect Architecture

Birlasoft EDM Connect Implementation Options

Implement EDM Connect on customer ERP server

Pros

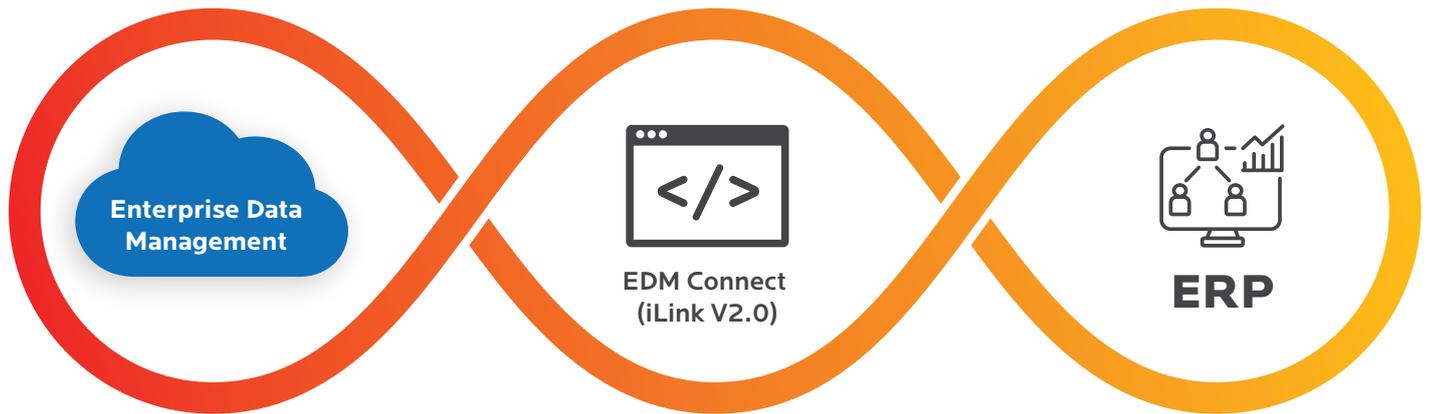

- Internal IT team can provide service, maintenance, and support quickly
- Purpose - built to meet ERP application requirements with tighter and more robust integration, when working with one application
- No additional technology or resources are required

Target Customers

- Customers using EDM for data governance for one application (EBS / JDE / SAP)
- An industry with high privacy concerns or compliance regulations, it may be best to have on-premises products that no other parties can access
- Looking for investment as a CAPEX cost without any OPEX cost

Implement EDM Connect on any (Birlasoft / Customer / External) Cloud server

ORACLE® E-BUSINESS SUITE ORACLE® JD EDWARDS

Pros

- Scalable to extend this integration to multiple ERP applications with minimal efforts
- Facilitation of integration between cloud EDM and multiple applications
- Minimal cost for setup and maintenance of EDM integration
- Can be controlled over the internet

Target Customers

- Customers using EDM across business functions using hybrid applications (CRM, ERP, HCM)
- Customers undergoing transformation projects and looking for a universal adapter that can be scaled up and down
- Looking for a subscription model with zero hardware, software, maintenance & support cost

Why EDM Connect

- Fits well for organizations looking for EDM Cloud to be integrated with multiple ERPs, without any middleware
- Faster and low-cost integration adapters using out-of-box features
- Designed to be on a scalable architecture
- Can be implemented without any changes to the core framework
- Supports bi-directional data movement from/to EDM Cloud (both inbound and outbound to EDM Cloud)
- Installable on all the platforms including ERP platforms
- Provides a user interface for mapping with multiple ERPs
- Provides Email notifications/alerts during the synchronization process

Birlasoft EDM Connect Benefits

- 100% configurable tool
- Reduce integration time during implementations
- Dashboard for error handling
- Supports multiple legacy ERP application

Why Birlasoft?

- Birlasoft has completed **185+** Oracle Cloud Engagements across all the tracks of Cloud Applications
- Birlasoft is the only SI across the globe that has developed a various integrated packaged business solution with Oracle Cloud Applications, tightly integrated with CPQ, JDE, EBS, SAP
- **30+** proven solutions implemented for Cloud projects
