

Automate your Trace Generation Process TraceGen™

Trace Generation Challenges

TKPROF is a Performance Diagnostic Tool provided by Oracle that can help you monitor and tune Applications running against Oracle Server.

Now, while this tool has its own set of advantages, there are inherent issues such as monitoring and controlling the Trace which severely limits it's own effectiveness.

With current approaches, developers are highly dependent on the DBA for getting the desired output. It takes them a tedious 7 to 8 steps for complete Trace Generation. Also, if the Trace is not controlled, it leads to performance and space issues about which the development team is clueless.

Birlasoft Solution

Birlasoft's Oracle CoE Team has developed a utility dedicated to Optimize Trace Generation Process called TraceGen™. This utility will eliminate the administrative overheads. In true sense, it will help to proactively tune applications in the fastest possible way. Some of the prominent features as below :

- Bolt-on Utility – becomes part of e-Biz Suite
- Extensive pre-check validations
- Parameterized and configurable
- Automatic notification facility
- Standard Trace file naming convention

Traditional Process

TraceGen™ Process Flow

Benefits

- Streamlined process resulting in reduction of cycle time for trace generation by 70%
- Facilitates transfer of ownership of trace generation process from DBA to development team
- Empowers the development/support team towards effective and quick code analysis
- Pre-check and pre-configuration setups to monitor and control the trace generation process

Birlasoft Oracle Practice provides Oracle and process-based expertise to Manufacturing, Automotive and Energy industries.

More than 2,000 Oracle professionals deliver a powerful combination of industry experience and Oracle knowledge in the following areas:

- E-Business Suite
- JD Edwards
- Agile PLM
- CRM On Demand
- Value Chain Planning
- Value Chain Execution
 - Oracle Configurator
 - Warehouse Management
 - Oracle Transportation Management
- Business Intelligence and Hyperion
- Fusion Middleware
- Global Services and Support
