

Comprehensive, flexible, single-pane JD Edwards EnterpriseOne Monitoring with unprecedented detail and insight.

## Reduced Resolution Time

All essential information on a single pane of glass. Can traverse multiple servers and hundreds of log files to help solve the puzzle.

## Proactive Monitoring

Reduce unexpected downtime by identifying and resolving issues before they impact the business

## Flexible

Integrate your existing monitoring scripts/solutions, or add monitoring for your third-party integrations with ease

## Data Driven Planning

Historical and real-time data points to make an informed decision, when planning for a JDE server expansion, migration or upgrade

## Detailed User Insight

User behavior analytics to determine usage patterns, peak loads, most used E1 applications, and historical sessions

Built on industry leading **Machine Data** platform

**Customizable** dashboards, alerts, and metrics

**Designed** from the ground up for **E1**

**Real-time** and **predictive** monitoring with trend analysis

**Real end-user** behavior & performance monitoring

Monitor infrastructure KPIs, JDE KPIs, UBEs, logs, with metric **history**

**24x7** automated monitoring and portal access
