

bCloud+

**A simplified approach
to running Oracle EBS
on Cloud**

There has been a revolution in the way a business views their IT expenditures, looks out for ways to convert their CAPEX into OPEX, and reduce spending on maintenance of systems. Enterprise customers are embracing digital transformation and cloud adoption of their applications with ERP at the core of their ever-expanding business needs.

Birlasoft is one of the leading Oracle E-Business Suite (EBS) solutions providers and successfully executed Oracle EBS projects globally for over 25 years. We are recognized as an Oracle worldwide partner with the skills and demonstrated experience to build, deploy, run, and manage Oracle workloads in the Oracle Cloud.

Overview

bCloud+ migrates your on-prem EBS instance into an EBS-as-a-Service model on Oracle Cloud Infrastructure (OCI). With a simplified flat fee structure, we take care of the migration - most often with minimal downtime, and full responsibility for the on-going maintenance of the EBS instance - with global expertise and 99.9% uptime.

You can migrate or implement most on-premises EBS to run on OCI without significant configuration, integration, or business process changes. This results in an implementation that is more flexible, reliable, with higher performance, and lower cost than either on-premises or other cloud solutions. Birlasoft has a proven solution to accomplish these outcomes quickly and reliably, which includes procedures, reference architectures, and support structures. For a single monthly fee, we will manage Oracle Cloud, DB administration including access to Birlasoft's Zabbix Monitoring Solution and automated package deployments.

The bCloud+ architecture has been specially engineered to ensure a smooth adoption of Oracle EBS on OCI with minimal business disruption, and considers real production needs, like Highest support Coverage, security, network configuration, customer required opted Oracle EBS-as-a-Service model.

Reimagine your business with fully managed EBS on OCI

Right from migration to continuous operations

Expert Support

Always-on 24x7 SLA-bound support from a global service desk powered by a cutting edge ITSM solution

Reduce IT Budget

Channel your IT spending towards strategic initiatives and leave your EBS maintenance with our EBS OCI experts

Stay Current

Tools Releases, DB patching, and upgrades are included

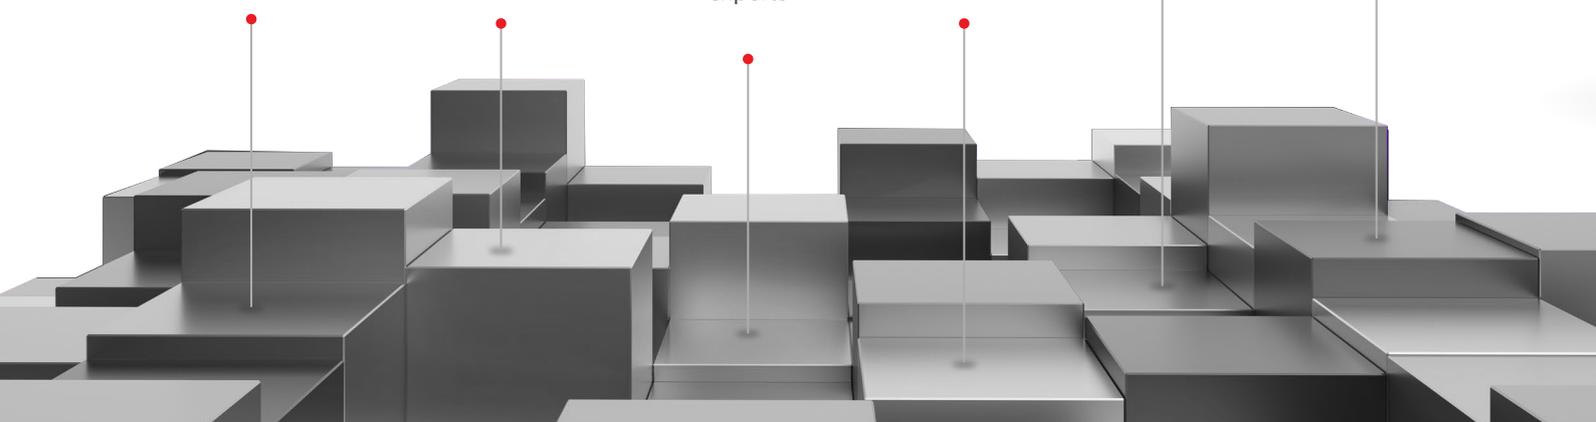

Data Security & Durability

Includes OCI Apps DB-as-a-Service (DBaaS) and optional upgrade to Oracle Database

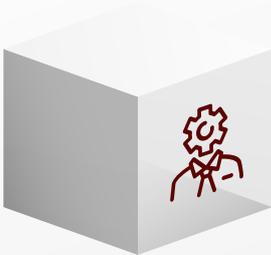

One Contact

Birlasoft with its Oracle CSP status can provide complete integrated services for everything EBS and OCI related

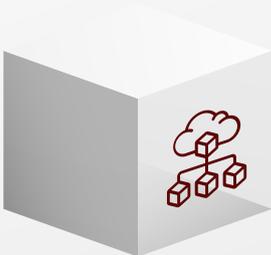

Why bCloud+ is the right choice for JD Edwards application journey on Oracle Cloud Infrastructure?

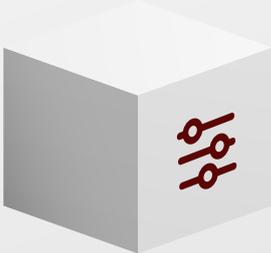

Expertise & Experience

With Birlasoft bCloud+ offering, you are supported by the world's largest and leading EBS solutions provider. We have been successfully executing EBS projects globally for over 25 years. With the Oracle Cloud Solutions Provider Expertise from Oracle, we are recognized as a partner with the skills and demonstrated experience to build, deploy, run, and manage Oracle and non-Oracle workloads in the Oracle Cloud.

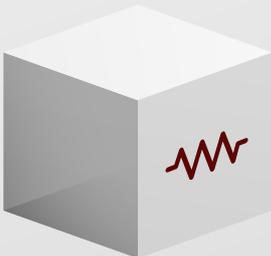

Oracle Cloud Infrastructure

Oracle Cloud Infrastructure was designed specifically to support workloads like Oracle EBS 12.2.x. Oracle Cloud Infrastructure delivers higher-performance compute, storage, networking, and managed database instances that result in a better experience for your users at a lower cost of operation. Oracle Cloud Infrastructure also provides compliant data centers in various regions around the globe.

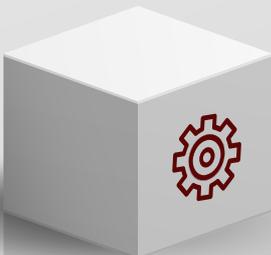

Choice and Control

Multiple reference architecture models governed by concurrent users, and the ability to run EBS workloads, bCloud+ gives you the flexibility to move your entire EBS instance landscape to the cloud. We take full ownership of the cloud deployment letting your IT team focus on strategic initiatives, but at the same time ensuring that you have full control over any JDE customization, configuration, and security.

Stay Current with your Oracle EBS System in OCI Cloud

An all-inclusive pricing model keeps your OCI infrastructure current, provides value added services like yearly tools upgrades, advanced monitoring, and system assessments by a certified Oracle EBS-DBA/OCI Admin specialist.

SLA-backed Services

OCI is the only public cloud offering that provides end-to-end SLAs covering performance, availability, and manageability of services. bCloud+ augments this further by offering industry leading SLAs around EBS services, enabling you to use a reliable and proactively monitored system.
