

iLink – The JD Edwards Adaptor for Oracle Commerce

Seamless JDE to Oracle Commerce integration

Are you a JD Edwards customer looking to rapidly implement Oracle Commerce, a cloud-native, fully featured, extensible SaaS commerce solution, delivered in the Oracle Cloud, supporting B2C and B2B models in a single platform? Are your JD Edwards and Oracle Commerce truly integrated? If you are manually re-keying data between your JD Edwards and Oracle Commerce systems, you risk introducing errors. This reduces the quality of data and increases organization inefficiencies and cost. Trying to build an integration from scratch between the two systems increases the cost and timeline to implement a true end-to-end solution and increasing the time to realize the true benefits and ROI.

Eliminate these risks and challenges with Birlasoft's iLink adaptor for JD Edwards (JDE) and Oracle Commerce. iLink's pre-integration between Oracle Commerce and JDE enables automated, real-time, bi-directional sync-up and eliminate the challenges throughout the ordering, pricing, inventory and customer data sync-up. It notifies you of issues and streamlines your operations with seamless, automated integration of JDE and Oracle Commerce.

iLink for OCC provides the following pre-built interfaces

Order submit interface

Order history interface

Order detail interface

External price calculator Interface

External price validator Interface

Update OCC order interface

Address synchronisation interface
