

Birlasoft achieves 50% reduction in Total Cost of Ownership for a Fortune 500 Firm through its ERP implementation service

CHALLENGES

The client, an Aviation Manufacturer based out of USA, wanted to identify gaps between OOTB and Aviation Systems business needs, and produce the initial configuration. The exercise was challenging as the Client had sites across multiple geos. This entailed understanding of the functional designs followed in each of the different locations, identifying pillar applications being used across locations, integration of modules to third party tools, converting the different Legacy systems into Oracle R12. It also included compliance and security for the export controlled data and adhering to stringent Audit standards.

SOLUTIONS

Converted and consolidated legacy applications across 20+ locations and decommissioned 50+ applications to provide one integrated system on latest ERP platform

- Involved multi-phase Delivery
- 3 iterative CRPs, pillar interface development, data conversions, end user training and site deployment
- Continuous changes to the Configuration, Support, Testing & Documentation
- Multi-instance deployment of configurations
- Post-cut over transition to support
- FastWorks implementation approach (Agile based Lean approach) with deployment of
- Minimum Viable Product (MVP) to focus Business
