-  Efficient Job Scheduling
-  Real-Time Back-End Updates
-  Reduced Travel Time for Field Staff

Improve Productivity by **35%**

Reduce Cycle Time by **30%**

Optimize Planning by **20%**

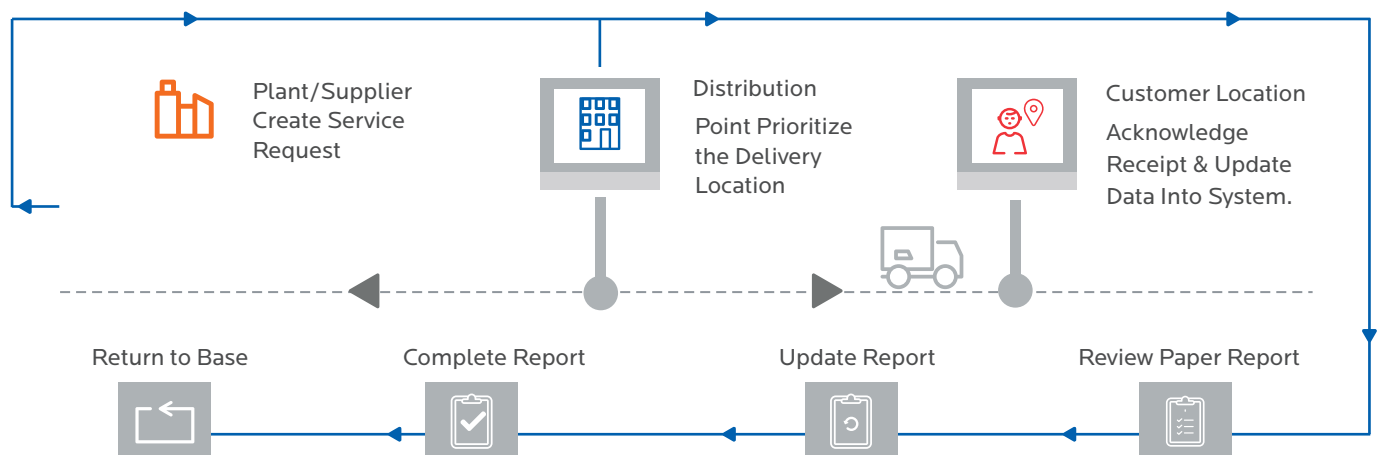

Electronic Proof of Delivery

The Proof of Delivery document provides a legal assurance that the item or product has been delivered by the vendor and received by the customer. While conventionally this action has been carried out on paper, current business challenges have rendered paper based POD documents futile. Paper PODs cannot meet the following business requirements

- Real-time updates
- Data Security
- Automated data entry
- Optimized planing and scheduling

While these are only a few examples, today's businesses need a robust and scalable electronic proof of delivery solution that can easily integrate with existing infrastructure and be available on a varied mobile ecosystem.

Introducing ePOD from Birlasoft

ePOD Features

Customized for Businesses

ePOD is modular and can be customized according to business size, from small to large and corresponding business requirements.

Low TCO

ePOD leverages existing infrastructure to achieve lower TCO and reduced initial investment.

Online/Offline Sync Mechanism

ePOD enables businesses to capture data at the point of transaction at all times, thus allowing data analysis in real time.
