

intelli**OPEN**™

OPEN YOUR BUSINESS WITH CONFIDENCE

An intelligent system for contactless screening of people, social distancing monitoring, and contact tracing

Gold
Microsoft
Partner

Reopening businesses and continuing operations during the COVID-19 outbreak will require EHS, facility management leaders, and CIOs to work together to safeguard their facilities, employees, and visitors from the virus. **Self-screening and Thermal screening** provide the much needed first line of defense to identify people with Elevated Body Temperature (EBT).

However, to combat the COVID-19 situation in workplaces and facilities comprehensively, businesses need a **second line of defense**, which will help enforce **social distancing**, and identify at-risk employees and visitors through **contact tracing**.

Birlasoft intelliOpen™ uses **digital** technologies to improve worker **safety** and ensure business **continuity**. intelliOpen empowers organizations to monitor **social distancing** compliance, **trace contacts**, and predict potential **high-risk** areas. Managers are provided with rich insights and analytics for the visibility they need.

Businesses can now instill **confidence** in their employees and customers that they provide the highest order of safety across their operations, from manufacturing plants, warehouses, and corporate or regional facilities, to store fronts and field locations.

Self Screening

Enable employees to perform self-check-in and self-declaration in a touchless manner. Based on their inputs, the system makes recommendations for second level screening (i.e. thermal screening). This self-screening module also integrates with the employee badge system

Thermal Screening

Screen employees, workers and visitors for EBT in real time. Enable secondary screening workflows of EBT individuals. Provide facility-wise dashboards to Health & Safety and compliance officers

Social Distancing Compliance

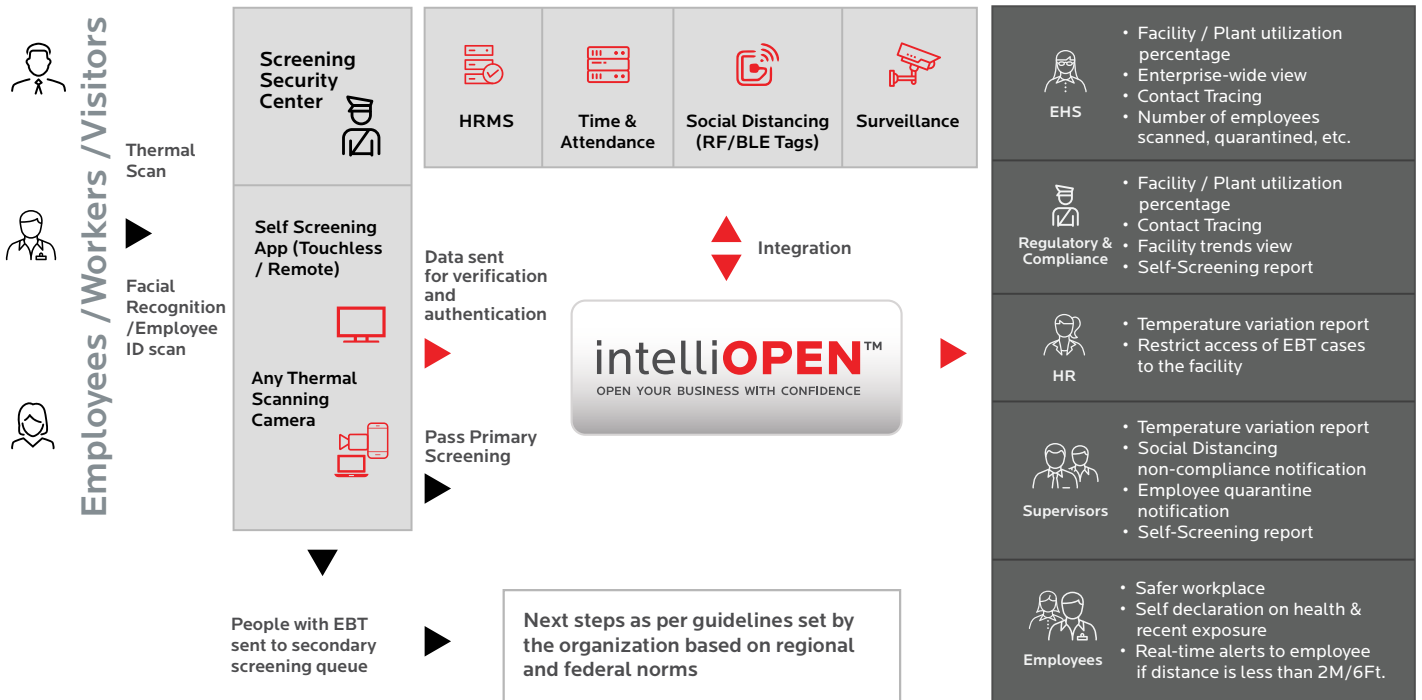

Implement and administer social distancing compliance with proximity detection technologies, which are easy to carry or wear. Discover hotspot areas and define social distancing workflows in those areas to ensure everyone's safety

Contact Tracing

In case an employee is found to be COVID-19 positive, identify contacts who came in proximity (configured distance of 5 to 6 feet) of the infected person and the contact duration. Get recommendations for employees, who need to be monitored closely based on their risk profiles generated by our contact tracing application

How it works

The solution is powered by Microsoft Azure

Benefits

Improved Assurance

Assure the highest order of safety with features such as contactless screening, employee self-declaration, and integration with systems like Time & Attendance and access control. Get the flexibility to choose hardware (thermal cameras, contact tracing tags, etc.) based on regulations

Early Detection

Improve employee and worker safety. Proactively make contingency plans by analyzing safety metrics and trends discovered over multiple days across multiple facilities

Rapid Action

Send alerts & notifications to key stakeholders in the event of new EBT or quarantine case detection, non-compliance of social distancing, and/or facility hotspot identification. Redirect EBT cases to secondary screening queue. Restrict access of EBT or confirmed cases and support them with timely medical aid and quarantine guidance

Stringent Compliance and Vigilance

Trace those who came in proximity of symptomatic or COVID-19 positive employees during their asymptomatic phase. Generate and maintain regulatory compliance reports related to facilities, etc., by analyzing data gathered over multiple days. Birlasoft intelliOpen™ is HIPAA and GDPR compliant to ensure data privacy and confidentiality

Shift focus from reactive measures to control the spread of COVID-19 and disrupted operations, to proactive measures and sustained operations.

Robust and flexible

intelliOpen™ is built on our proven IoT & Analytics platform. The solution is agnostic of hardware (thermal cameras, contact tags, etc.) make or model

Works for all industries

Manufacturing, Retail, Airline, Hospitality, Life Sciences, BFSI, Energy & Utilities, and Professional Services firms

Quick implementation

Advisory, assessment, implementation, and support for end-to-end rollouts. The solution can be deployed in a week's time

Flexible commercial model

Flexible pricing models to meet your unique business needs and budgets

Strategic Alliances

As a Gold level, Strategic Cloud Alliance partner for Microsoft, Birlasoft helps organizations accelerate their business transformation with end-to-end cloud services powered with our proven frameworks, accelerators, solutions
