Verifiable Cyber Resilience for Insurers

From Assumption to Proof in Cyber Underwriting

Cyber underwriting increasingly depends on controls like ***Multi Factor Authentication (MFA)*** - yet most decisions still rely on self attestations, not proof.

Birlasoft's Verifiable Cyber Resilience solution enables ***evidence based MFA validation,*** helping insurers replace assumptions with defensible, audit ready underwriting decisions.

The Challenge: MFA Is Claimed, Not Proven

Underwriters rely on questionnaires & declarations that often fail to reveal whether MFA is:

- Consistently enforced across users and applications
- Correctly configured and not partially enabled
- Actively monitored and not easily bypassed

The result: slower underwriting cycles, repeated follow ups, audit friction, and reduced confidence in pricing and portfolio risk.

The real gap isn't lack of controls-it's lack of proof.

The Birlasoft Advantage: Verifiable MFA Validation

Birlasoft enables insurers to ***verify - not assume - MFA enforcement*** in a secure, non intrusive manner.

- Independent validation of actual MFA adoption
- No infrastructure changes or credential storage
- Objective, measurable, and auditable evidence

What This Enables

- **Audit Ready Evidence:** Verifiable reports with MFA coverage percentages
- **Faster Underwriting:** Fewer clarifications and manual follow ups
- **Confident Decisions:** Reduced subjectivity in risk assessment
- **Continuous Validation:** New business, renewals, portfolio reviews
- **Better Pricing:** Quantifiable inputs for risk based underwritingt

How It Works - Simple, Secure, Verifiable

- **Scope Defined** as part of underwriting or risk assessment
- **Secure Validation Execution** by the insured
- **Automated Evidence Capture** of MFA coverage
- **Clear Outcomes with** audit-ready reports

What Changes for You

Traditional Underwriting	*With Birlasoft*
Declared controls	Verified enforcement
Manual validation cycles	Automated, repeatable evidence
Subjective decision making	Defensible underwriting decisions
High Audit friction	Audit-ready validation

Why Birlasoft

- Deep domain expertise across ***Insurance and BFSI***
- Strong focus on ***measurable business outcomes***
- Secure, scalable, and ***non intrusive validation approach***
- Proven ability to bridge strategy and execution for insurers

Close the Trust Gap in Cyber Underwriting

Validate what matters - before you price the risk. Move beyond attestations. See MFA enforcement with confidence.
