Integrated Solution for Freight Forwarding
Integrated Solution for Freight Forwarding

The volatility in the business environment, advent in new technologies, and the uncertain global economy are impacting the way organizations perform in the Freight Forwarding industry. In order to stay relevant and experience growth, freight forwarders need to address the multiple challenges which they face daily like lack of collaboration within agencies, vendors and partner networks, multiple siloed systems, lack of visibility of cargo and shipments, lower margins, lack of control and visibility on revenue, expenses and operations.

Birlasoft understands how difficult it can be to manage these challenges and focus on business growth. Birlasoft’s Integrated Solution for Freight Forwarding provides a platform for efficient omnichannel delivery, effective collaboration with all stakeholders (agencies, partners, vendors & customers), end-to-end shipment visibility for internal business as well for your customers, partner, and vendors.

The Oracle cloud-based, Freight Forwarding solution is fully integrated and comprehensive, and covers all pain points of freight forwarders including,

- Comprehensive quote before job booking to ascertain the profitability and required approvals
- Tracking of shipments on a real-time basis
- Updating status and exceptions to the customer on a real-time basis
- The online placing of bookings with carriers
- Filing manifest and declarations from system
- Automate the manual process
- Single Source of truth for end-to-end operational and financial data
- Job profitability comparison between planned, provisional, and actual
- Managing complex trans-shipment and bill of lading scenarios

Value Proposition
