```

# RPrIm

Rapid Project Implementation -  
“Smart” Way to Configure Cloud Applications

RPrIm is a robotic configuration tool for a business analyst to perform the configuration. The key functionality of RPrIm is to automate the Oracle Cloud Project Implementation after the Design Sign-off phase.

Birlasoft's RPrIm enables the implementation team to configure one task or group of tasks based on the Oracle implementation manuals. RPrIm helps to save the time by automating the configuration which in turn reduces the overall cost of implementation.

## Birlasoft RPrIm Process

## Why RPrIm

- The organization looking for rapid implementation
- Faster implementation leading to reduced cost
- Enterprise looking for proven tools to configure for BizDevOps functions

## Birlasoft RPrIm Benefits

- 100% automated configuration across all the tracks
- Save up to 80% manual effort in configuration
- 50% fewer efforts for configuration during CRP, UAT & Prod

## Why Birlasoft

### Top Birlasoft Differentiators

Birlasoft has completed

**185+**  
**Oracle**  
**Cloud**

Engagements across  
all the tracks of  
Cloud Applications

Birlasoft is the only SI across  
the globe who

**developed various**  
**integrated packaged**  
**business solution with**  
**Oracle Cloud**  
**Applications**  
**integrated with**  
**CPQ, JDE, EBS, SAP**

**30+**  
**proven**  
**solutions**

implemented  
for cloud projects
