Robust, Flexible Transportation Management

Increasingly complex and globally distributed supply networks, cost pressure, volatile fuel prices, shifting capacity levels and demanding mandate of flexible order fulfillment have turned transportation management into a key driver for supply chain superiority. Leveraging power of Oracle Transportation Management (OTM), Birlasoft adds transformational value to deliver robust and flexible transportation management solutions.

From strategy through process improvement to implementation and support, complete services from Birlasoft help you realize the full potential of your investment in transportation technology.
