Managing the transition of a Bill of Material (BOM) from Design to Manufacturing is a complex task as the BOMs are managed by different applications and continue to evolve independently. The engineering team then must manually compare Engineering BOMs and Manufacturing BOMs to identify the differences between them, which is a labor-intensive process.

Birlasoft provides PTC Navigate based App, which helps to identify the differences in only two clicks!

We leverage our PLM expertise, and inventory of PLM business connectors to create a mash-up suited to your business needs.

• Increase productivity and improve accuracy
• Rapid deployment with minimal configuration
• Easy navigation enabling quick adoption

Features

• Just two clicks to fetch the BOMs and underline the differences
• Highly visual comparison helps quickly identify the additions, deletions and modifications between BOMs
• Easily configurable to work with different ERP systems like SAP, Oracle EBS or Infor
• Easily configurable to work with different PLM systems like Agile PLM, Teamcenter or Windchill
Birlasoft combines the power of domain, enterprise and digital technologies to reimagine business processes for customers and their ecosystem. Its consultative and design thinking approach makes societies more productive by helping customers run businesses. As part of the multibillion diversified CK Birla Group, Birlasoft with its 10,000 engineers, is committed to continuing our 150-year heritage of building sustainable communities.
