

Tech Notes

Aerospace & Defense Contractor Case Study

Summary

By implementing the Birlasoft Tech Notes add-on for PTC® Windchill®, an Aerospace and Defense Contractor was able to achieve substantial efficiency gains through reduction of note checking and writing time.

Customer Profile

By implementing the Birlasoft Tech Notes add-on for PTC® Windchill®, the aerospace and defense contractor was able to achieve substantial efficiency gains through reduction of note checking and writing time.

Customer Needs

The contractor used a disconnected, home-grown database of engineering notes and required the functionality of this system integrated into Windchill.

Solution Profile

Birlasoft's Tech Notes add-on was used to systemize and organize process notes in Windchill, resulting in decreased note variability and time spent on writing, a significant reduction in checking and proofreading of notes, and less supplier and manufacturing confusion.

Tech Notes Features

- Database, application logic, and user interface integrates with Windchill
- Associates notes to any of PTC's supported CAD applications
- Standard Note Definitions can be created/maintained by manufacturing process managers
- User-definable, ASME compliant automated note number management

Tech Note Users

- **Windchill Administrators** more easily ensure compliance and standardization across the organization.
- **Engineers** experience simplified and streamlined note usage in engineering documents.
- **Quality Assurance Engineers and Change Auditors** improve note quality through Tech Notes' built-in note standardization capabilities.
